

Activity-10: Picture collection.

Aim:

Collection of animal pictures.

Procedure:

Students should collect photos and diagrams of various kinds of animals.

Searching for photos in magazines and newspapers would be a good start.

Go ask your neighbours and relatives for old magazines and newspapers and search for animal picture.

When you have more than 2 pictures of the same animal, preserve the one which is larger in size and has greater clarity.

If students have access to a camera, they can take photos of the animals.

3 pages should be dedicated to each animal.

If students can actually draw animal diagrams then they should.

What to do next-Purpose:

The following two activities are about description of animal shapes and colours. These pictures will be useful for them.
