

Task-4:

Study the diagram and try to answer the question.

Snakes do not have legs. But still they are good hunters! How do you think snakes hunt? If you and your friends had to go to a jungle to trap an animal and bring it back alive. You will need spears or bow & arrows. Unfortunately you do not have a cage but only a long, strong stick. What else will you need along with it to bring back the animal alive? Hint: how does a snake look like?
